

# ITF National Association Development Eligibility Criteria 2024

Updated: 13 December 2023

The 2021-2024 ITF Development strategy focuses on six strategic areas: Events, Performance, Participation, Education, Facilities and Administration & Resources. A range of projects and opportunities sit within these strategic areas and these are in place to achieve the strategy's two core objectives:

1. to increase participation in tennis worldwide for all ages, genders, playing standard and physical abilities; and
2. to develop talented players, particularly those from nations that are both under-resourced and under-represented.

These two objectives will significantly contribute to the growth of the total players population to 120 million by 2030 under ITF2024.

Each ITF member National Association is assessed for its eligibility to benefit from these projects and opportunities, with the eligibility based on the assessment of a nation's level of resource and its representation in professional tennis namely in the Grand Slam tournaments, Davis Cup and Billie Jean King Cup by Gainbridge. The ITF National Association Development Eligibility Criteria for 2024 is detailed below.

## Resource Criteria\*

To attain status as a resourced nation, a National Association's respective national Gross Domestic Product (GDP) per Capita should have:

- A. World Bank ranking of nations above the 2022 World Bank Global Average GDP per Capita (updated September 2023) - 2022 used in the first instance, with 2021 figures then taken if 2022 figures unavailable.
- B. United Nations National Accounts Main Aggregates Database per Capita GDP (updated January 2023) ranking of nations 2021 - above the 2022 World Bank Global Average GDP per Capita.
- C. World Bank ranking of nations above the 2022 World Bank Global Average GDP per Capita (updated September 2023) - 2020 figures taken if criteria A and B above are unavailable.

*\* Resource Criteria: There are a total of 80 National Associations with a national GDP per Capita that sit above the 2022 World Bank Global Average, and deemed "Resourced". World Bank Ranking data is used for a total of 196 National Associations (181x using 2022 figures, 13x using 2021 figures and 2x using 2020 figures). The United Nations National Accounts Main Aggregates Database per Capita GDP data is used for a further remaining 13x National Associations. Of the 80 Resourced National Associations, 76x are sourced from the World Bank Ranking Data, while 4x are sourced from the United Nations National Accounts Main Aggregates Database per Capita GDP data. There are 4x National Associations where no GDP per capita data is available from either source and are deemed under-resourced for the purpose of this Criteria.*

## Representation Criteria<sup>1</sup>

To attain full representation, a National Association should have:

- A. Men's Representation - At least three men (singles main draws) in 2020-2023 Grand Slams<sup>^</sup>, with direct acceptance and qualifier status only; AND be Top 24 Davis Cup rankings based on the year-end rankings 2022 (updated 27.11.23).
- B. Women's Representation - At least three women (singles main draws) in 2020-2023 Grand Slams<sup>^</sup>, with direct acceptance and qualifier status only; AND be Top 24 Billie Jean King Cup by Gainbridge rankings based on the year-end rankings 2022 (updated 13.11.23).

<sup>^</sup> The Championships, Wimbledon were not staged in 2020 due to the global Covid-19 pandemic.

<sup>1</sup> In some cases, National Associations may attain only some specific components of representation (ie. Represented in men but not in women tennis), but not others and therefore are deemed to have a degree of representation.

## **Development Eligibility Tiers**

Based upon the above criteria each nation is categorised in one of four tiers:

**Tier 1:** Nations that are most in need classified as both under-resourced and under-represented and placed in “Tier 1”.

**Tier 2:** Nations that are under-represented but resourced are included in “Tier 2”.

**Tier 3:** Nations placed in “Tier 3” have a degree of representation whether under-resourced or resourced.

**Tier 4:** Nations that are both resourced and represented are placed in “Tier 4”. Tier 4 nations meet the full resource and representation criteria and have a greater degree of tennis maturity and lower requirement for development support. Tier 4 nations are therefore not eligible to access specific ITF Development programmes, as highlighted in the ‘Global List of Nations & Tiers of Eligibility 2023’ diagram below.

# ITF Development Eligibility Criteria 2024 | Global List of Nations & Tiers of Eligibility

## Resource Criteria\*:

- A. World Bank ranking of nations above the 2022 World Bank Global Average GDP per Capita (updated September 2023) - 2022 used in the first instance, with 2021 figures then taken if 2022 figures unavailable.
- B. United Nations National Accounts Main Aggregates Database per Capita GDP (updated January 2023) ranking of nations 2021 - above the 2022 World Bank Global Average GDP per Capita.
- C. World Bank ranking of nations above the 2022 World Bank Global Average GDP per Capita (updated September 2023) - 2020 figures taken if criteria A and B above are unavailable.

## Representation Criteria:

- A. Men's Representation - At least three men (singles main draws) in 2020-2023 Grand Slams<sup>^</sup>, with direct acceptance and qualifier status only; AND be Top 24 Davis Cup rankings based on the year-end rankings 2022 (updated 27.11.23).
- B. Women's Representation - At least three women (singles main draws) in 2020-2023 Grand Slams<sup>^</sup>, with direct acceptance and qualifier status only; AND be Top 24 Billie Jean King Cup by Gainbridge rankings based on the year-end rankings 2022 (updated 13.11.23).

KYRGYZSTAN	YEMEN			
LAO	ZAMBIA (Suspended 2013)			
LEBANON	ZIMBABWE			

### KEY

- ✓ Nation is eligible for project
- ✗ Nation is not eligible for project
- M** Nation does not have at least three men represented in Grand Slams
- F** Nation does not have at least three women represented in Grand Slams
- DC** Nation is not Top 24 Davis Cup
- BJKC** Nation is not Top 24 Billie Jean King Cup by Gainbridge

### NOTES

\* Resource Criteria: There are a total of 80 National Associations with a national GDP per Capita that sit above the 2022 World Bank Global Average, and deemed "Resourced". World Bank Ranking data is used for a total of 196 National Associations (181x using 2022 figures, 13x using 2021 figures and 2x using 2020 figures). The United Nations National Accounts Main Aggregates Database per Capita GDP data is used for a further remaining 13x National Associations. Of the 80 Resourced National Associations, 76x are sourced from the World Bank Ranking Data, while 4x are sourced from the United Nations National Accounts Main Aggregates Database per Capita GDP data. There are 4x National Associations where no GDP per capita data is available from either source and are deemed under-resourced for the purpose of this Criteria.

<sup>^</sup> The Championships, Wimbledon were not staged in 2020 due to the global Covid-19 pandemic.
